

Title of the Invention:

Single sanitary serving toothpaste encapsulation

Background of the Invention

This invention relates generally to the field of brushing teethe and more specifically to a process for creating a single serving of toothpaste for the purpose of having a sanitary supply each time it is used, and to be able to dispense the product in many different ways

Brief Summary of the Invention

The primary object of the invention is : Toothpaste Singles deliver a sanitary serving to the user , each time it is used.

Another object of the invention is It is convenient for travel.

Another object of the invention is It is fun for kids to use and healthier.

A further object of the invention is You don't have to take a whole tube of toothpaste with you ,wherever you need to brush!.

Yet another object of the invention is It can be dispensed in many different ways, unlike a tube..

In accordance with a preferred embodiment of the invention, there is disclosed a process for creating a single serving of toothpaste for the purpose of having a sanitary supply each time it is used, and to be able to dispense the product in many different ways. comprising the steps of:

1. Open encapsulation
2. Dispense toothpaste onto toothbrush
3. Dispose of empty encapsulation
4. Brush teeth

Description of the Preferred Embodiments:

Detailed descriptions of the preferred embodiment are provided herein. It is to be understood, however, that the present invention may be embodied in various forms. Therefore, specific details disclosed herein are not to be interpreted as limiting, but rather as a basis for the claims and as a representative basis for teaching one skilled in the art to employ the present invention in virtually any appropriately detailed system, structure or manner.

The process is to dispense a measured supply of toothpaste in a single serving encapsulation for the purpose of brushing ones teeth with a sanitary toothpaste, creating a germ free product for the user each time it is used. The encapsulation can be made out of any material so the user will be able to dispense the toothpaste easily.

While the invention has been described in connection with a preferred embodiment, it is not intended to limit the scope of the invention to the particular form set forth, but on the contrary, it is intended to cover such alternatives, modifications, and equivalents as may be included within the spirit and scope of the invention as defined by the appended claims.
